CALL FOR LATE-BREAKING ABSTRACTS

DEADLINE: AUGUST 7, 2023

What is a Late-Breaking Abstract?

Abstracts considered “**late-breaking**” are those that contain new or important findings that were not available prior to the June 30th deadline for submission to the 2023 National Health Research Conference.

This call for Late-Breaking Abstracts is not an extension of the regular Abstract submission deadline. It is also not for investigators who inadvertently missed the deadline for regular abstract submission.

Criteria

Late-Breaking Abstracts will be considered for the 2023 NHRC if they fulfill the following criteria:

- The topic must be of critical importance to the clinical/scientific community and/or the public and be of national importance (significant, valuable, or necessary to members of the national community).
- The abstract must report data that became available for public dissemination only after the deadline for the regular abstract submission (June 30th, 2023).
- The study and results reported should be novel and not simply an extension of previously published work.

Guidelines for Late-Breaking Abstract Submission

THE ABSTRACT

The Abstract (from Objectives to Conclusion) must be no more than 250 WORDS and must be formatted as follows:

- a) **Title:** In bold type. Title case (as concise as possible). No abbreviations.
- b) **Authors:** Begin on a new line two spaces below the title. Use italics. List full names and omit degrees/ titles.
- c) **Institutional Affiliations:** Begin on a new line below Authors. Use italics. List: Department, Institution where work originated.
- d) **Email Address:** Include in the next line.
- e) **Text:** Arrange under the following sub-headings:
 - I. ***Objectives***
Introduce the main aim of the study to the reader in clear language.
 - II. ***Methods***
Describe the exact design, data collection and analysis.
 - III. ***Results***
Present the salient findings of the research with statistical support.
 - IV. ***Conclusions***
State the conclusions derived from the findings of the study and not overarching ones. Limit to only those directly supported by the results. Be as clear and specific as possible about the “take home” messages.

SUBMISSION

Email Abstract to: researchconferencett@gmail.com by Monday 7th August 2023.

All submitted Abstracts must have received ethics approval from the relevant Institutional Review Board or Research Ethics Committee.

In your email, please indicate whether the study/abstract was done by Academic Staff, Postgraduate Students, or Undergraduate Students.

Receipt of submissions will be acknowledged. If you do not receive an acknowledgment within three (3) days of submission, please contact:

Ms Alissa Moore or Ms Jamelia Anthony
Caribbean Centre for Health Systems Research and Development
The University of the West Indies
Tel: 662-2002 ext. 85486
researchconferencett@gmail.com

Publication

Selected abstracts will be published. Authors are required to submit a transmittal letter that states that all authors have approved the publication of the abstract, edited if necessary. The email address and contact number of the corresponding author MUST be included.
